

Team Meeting 1/20/2016

Agenda:

- Ideas, next steps
- Parts list
- Agenda for next meeting
- Time line

Parts List – Rough one by tomorrow, finalize by 1/27/2016

Lots of ideas to attach the scope:

Attaching the scope railing to T-slot railing, attach stanchion, attach holder with padding.

T-slot railing – want to external because cheaper and easier to attach things too.

Reason for T-slot railing idea: easy to use, easy to modify, easy to machine, lots of options, easy to purchase. \$3.15 a foot. Need like 60ft so only like \$100. Lots of options to attach the scope and pneumatics too.

Next step, start finalizing parts and building the new one. Really need accelerometer for finalizing the testing with first pendulum and getting good data.

Action Items:

Parts list rough by 1/21 – Jay and Dillon

Parts list finalized 1/27 – Jay and Dillon

Agenda for 1-21-2016

- Discuss new idea
- Rough parts list for new idea
- Testing for accelerometers
- Schedule and how we are on time
- Discuss detailed design review
